

Working with North Pacific Erectors in the past two years has truly been a pleasure. NPE's competitive pricing, extremely competent labor, attention to details, and to the needs and the unique situation at The Glory Hole has made it possible to complete several capital projects in a non-stressful and productive manner. North Pacific Erectors have done a great job of keeping down the prices, of doing great work and fixing any small problems which ever arose after the projects were complete. Furthermore, North Pacific Erectors are always available to step in when their services are needed. They listen to what the Glory Hole wants, are extremely easy to reach, and are always available to communicate with the client and to address any issues, in a timely and extremely helpful fashion. Most importantly, the quality of their work is solid and great.
